Strength Dermal Vitamin Cream with Calcium

SEABLUE® Strength vitamin cream combines calcium, Vitamin A, Vitamin D, and magnesium to promote bone health. While store-bought milk is an effective way of getting your calcium, many people suffer from milk allergies and must find another source of calcium, usually through vitamin supplements or juices. Oral supplements can diminish the absorption of thyroxin, which could cause additional problems. A dermal supplement works perfectly. Our calcium cream offers a unique and pleasant way to take your calcium without the trouble of bulky or chalky pills.

Benefits: SEABLUE® Strength Dermal Vitamin Cream with Calcium is designed to:

- Promote skin health
- Promote healthy vision
- Fight against heart disease diabetes and migraines
- Relieve constipation
- Reduce inflammation

Main Ingredients: SEABLUE® Strength vitamin cream combines calcium, Vitamin A, Vitamin D, and magnesium to promote bone health.

Suggested Use: Each dermal application contains above ingredients. Apply twice daily to inner forearms
